## **Module 11 Empowerment & Changing the Narrative** Methodology: Instructing Youth Youth-specific modifications: When offering trauma-informed yoga to youth, programs must be modified to meet the unique physical and mental needs of vounger generations. Structure and pacing: Youth classes often feature shorter time spent on individual activities to support focus and attention. Pose adaptations: Poses should be modified to accommodate growing bodies, with an emphasis on safety and accessibility. Incorporating games and activities: Games that foster leadership, compassion, and prosocial behavior are strongly encouraged to build engagement and life skills. Benefits for youth: Increased strength and flexibility Enhanced immune system function Improved stress resilience Boosted self-esteem and accomplishment Growth in compassion, empathy, and hope for the future Creative teaching tools: Explore provided images and videos for youth posture variations and chair practice examples. Consider using creative names for poses to enhance engagement and memorability. Preparing your final sequence: Integrate youth-specific variations into your teaching plan. Adapt the practices to align with your authentic voice and teaching style. Neuroscience of Yoga / Impact of Youth Trauma Differences in youth needs: Youth brains are still developing (pre-frontal cortex), leading to: Focus on risk-taking and thrill-seeking Difficulty considering consequences Increased impact of trauma on emotional regulation and focus • Common trauma responses in youth: Dissociation to survive, needing more novelty to feel emotions ADHD often linked to childhood trauma Growing, unfamiliar bodies can make balance and coordination difficult Yoga practice for youth should: Promote concentration but avoid asking for long sustained focus Include novel, joyful experiences in a safe environment

Research-Backed Benefits of Trauma-Informed Yoga 1	for Youth:		
Increase sense of control and agency:			
<ul> <li>Trauma takes away bodily autonomy.</li> </ul>			
<ul> <li>Yoga empowers youth through choice and degree</li> </ul>	es of participation, sup	porting confidence and	d self-worth.
Rewire the stress response:			
Trauma keeps the brain stuck in fight-or-flight.			
Yoga's repetitive, rhythmic movement builds new,	healthier neural path	ways, supporting exect	utive functions like focus,
decision-making, and emotional regulation.

Establishing a Class Theme			
Purpose of a Theme:			
<ul> <li>Connects the movement, breathwork, and message</li> </ul>	ge of the class.		
<ul> <li>Provides emotional and philosophical support bey</li> </ul>	ond physical practice		
Uses of a Theme:			
<ul> <li>Share aspects of yoga philosophy (e.g., Yamas, N</li> </ul>	liyamas).		
<ul> <li>Focus attention on emotions like strength, healing</li> </ul>	<u>, patience, or self-cor</u>	npassion.	
<ul> <li>Inspire deeper connection to the participants' heal</li> </ul>	ling journey.		
Your Theme Is Your Voice:			
<ul> <li>Themes should reflect your personal experiences</li> </ul>	, passions, and healin	ig journey.	
<ul> <li>Sharing authentically makes your offering more in</li> </ul>	npactful and relatable		
• Examples:			
<ul> <li>Ahimsa (Non-harm) if it resonates personally.</li> </ul>

0	Fear, aversion, attachment, ego, and ignorance gain power when we lose touch with our true self.
P	urpose of Svadhyaya:
0	It's an opportunity to investigate samskaras, reconnect with your true self, and choose healing.
0	Encourages continual evolution, learning, and adjusting focus as passions and interests grow.
Y	our Practice is Unique:
0	There's no timeline; your path is yours alone.
0	You are free to repeat, explore, and move at your own pace.
E	ncouragement for Growth:
0	Stay curious.
0	When emotions are stirred by events, policies, or relationships—educate yourself.
0	Learn from multiple perspectives, gather facts, and deepen your understanding.
0	Pass these lessons of self-awareness and growth on to those you serve.

Yo	our Voice Matters:
0	Your history, experiences, and passion are your greatest gifts as a facilitator.
0	Sharing authentically requires connecting deeply to what you teach.
Te	eaching from Authenticity:
0	It's difficult to teach what you don't understand or haven't lived through.
0	Your personal practice and self-study prepare you to guide others with genuine purpose.
U	naligned Expectations Cause Harm:
0	Expectations placed on you (e.g., "You'll be the first to go to college") can create deep emotional wounds.
0	Misalignment between imposed goals and personal truth can cause lasting trauma.
C	onnection to Social Justice:
0	Oppression of identity and rights still happens—politically and socially.
0	Standing for personal and collective freedom is necessary for true liberation.
S	elf-Confidence as a Revolutionary Force:
0	Self-confidence disrupts cycles of generational oppression.
0	True empowerment happens when individuals are supported to make choices aligned with their authentic selves.
H	ealing Through Empowerment:
0	Supporting your own healing—seeing, accepting, and empowering yourself—directly enhances your ability to support
	and empower others.
0	Reduces insecurity, jealousy, competitiveness, and fosters true community.
0	n and Off the Mat:
0	Whether practicing yoga or participating in community, empowerment of self and others contributes to collective healing
	and transformation.

Chronic Stress and Heart Health:  Chronic Stress keeps the sympathetic nervous system in overdrive.  Prolonged stress leads to inflammation, high blood pressure, and elevated risk for cardiovascular disease.  Stress sources include work, relationship challenges, anxiety, and depression.  The Heartbeat & The Breath: Instructing Self-Soothing  How Yoga Supports Stress Management:  Yoga builds awareness of how trauma and stress affect body functions.  Developing a personal centering practice is key for healing and regulation.  Facilitator Strategies:  Introduce practices that simulate rapid heartbeat and quick breath to mirror the Fight, Flight, Freeze Response in a controlled environment.  Offer centering ques like:  Notice the beating of your heart."  Bring your awareness to how your body is receiving and releasing breath."  Goal of These Practices:  Help participants recognize stress patterns in the body.  Teach how to slow the breath, focus on the exhale, and calm the heart rate.  Build foundational tools for self-regulation off the mat.  Long-Term Benefits:  Improves impulse control, anger management, and ability to relax.  Supports cardiovascular health by regulating blood pressure and nervous system balance.  Comparative Look at the Nedis  Scientific and Metaphysical Connection:  Just as the circulatory system moves blood, the nadi system moves energy through the body.  Understanding Kundalini:  Kundalini is spiritual energy resting at the base of the spine.  Bising kundalini is associated with higher self-awareness and ego transcendence.  Nadis and Chakras:  Three main nadis interweave through the chakras:  Sushumna: Central channel along the spine.  Ida: Left channel: cooling, lunar (feminine) energy.  Pringala: Right channel: warming, solar (masculine) energy.  Prana (life energy) flows through the nadis.  Lota and Pingala balancing supports emotional, mental, and physical health.	◆ Increased self-awareness can encourage healthier lifestyle choices.

o Improves impulse control, anger management, and ability to relax.  ○ Supports cardiovascular health by regulating blood pressure and nervous system balance.  Comparative Look at the Nadis Scientific and Metaphysical Connection:  ○ Just as the circulatory system moves blood, the nadi system moves energy through the body.  Understanding Kundalini:  ○ Kundalini is spiritual energy resting at the base of the spine.  ○ Rising kundalini is associated with higher self-awareness and ego transcendence.  Nadis and Chakras:  ○ Three main nadis interweave through the chakras:  ◆ Sushumna: Central channel along the spine.  ◆ Ida: Left channel; cooling, lunar (feminine) energy.  ◆ Pingala: Right channel; warming, solar (masculine) energy.  ○ Breathwork, movement, and chanting help "unblock" energy flow through the nadis.  Energy and Self:  ○ Prana (life energy) flows through the nadis.	Build foundational tools for self-regulation off the mat.

Posture & Sequencing:
Guiding Trauma-Informed and Healing-Centered Classes for Youth
Key Components of Youth Classes:
Clear Boundaries & Expectations:
Create safety and predictability for youth.
Playful and Accessible Postures:
Use creative names (e.g., "Star Pose," "Tree Pose") and storytelling to engage.
Shorter, Dynamic Activities:
Quick transitions, mini-games, and rhythmic movements maintain focus.
Leadership Opportunities:
Allow youth to lead poses or create short sequences to promote agency and self-esteem.
Mindfulness and Self-Regulation for Youth:
Breathwork and Guided Meditations:
◆ Use cyclic sighing, creative visualizations, and short mindfulness exercises.
Developmentally Appropriate Tools:
Activities support emotional regulation and help manage impulses.      ■ Activities support emotional regulation and help manage impulses.
Neuroscience and Trauma-Informed Yoga:
○ Adolescent Brain Challenges:
Prefrontal cortex still developing; dopamine levels drive risk-taking.
○ Impact of Trauma:
Trauma heightens hypervigilance and emotional dysregulation.
○ Benefits of Yoga:
Builds neuroplasticity (new neural pathways for focus and self-regulation).
◆ Increases autonomy, rewires stress responses, and improves emotional regulation.
Alternative Tools and Materials:
Tactile and Creative Options:
Squeezing tennis balls, art activities, journaling prompts.
o Benefits:
Build bridges to stillness for dysregulated or resistant youth.
Support Integration & Relaxation phases in a non-intimidating way.
Engage youth who are mandated to participate.

Key Principles:  Flexibility and Responsiveness:  Adapt class structure based on youth energy and emotional states.  Start with Active Movement if Needed:  Begin playfully if youth arrive stressed before moving to calming practices.

Start with Active Movement if Needed:	
<ul> <li>Begin playfully if youth arrive stressed before moving to calming practices.</li> </ul>	
Centering and Somatics are Essential:	
<ul> <li>Use tactile tools, grounding activities, and meditative practices to support regulation.</li> </ul>	
Example Youth Class Structure:	
<u>Septic Awareness:</u>	
◆ Grounding movements (jumping, stomping, rhythmic tapping).	
Range of Motion Exploration:	
◆ Gentle stretches for shoulders, hips, and spine (e.g., shoulder rolls, hip circles, Cat/Cow).	
Centering and Somatics:	
◆ Tactile activities or creative reflection for self-regulation.	
Strength & Resilience:	
Playful postures like Warrior poses, balance work, building confidence.	
Concentration & Focus:	
Rhythmic breathing, guided meditation, journaling.	
Ontegration & Relaxation:	
Restorative postures, visualization, tactile reflection tools.	
• Core Goals:	
Support Self-Discovery, Healing, and Empowerment.	
o Foster Autonomy, Emotional Regulation, and Resilience.	
Ensure Accessibility and Engagement:	
Use developmentally appropriate postures and creative mindfulness practices.	
Create Safe, Playful, Supportive Environments.
